White label software development of Microsoft Power Platform and Dynamics, for IT businesses

Software

Exclusively for IT businesses

We provide white label development and deployment services for IT businesses needing additional skills to offer their clients functionality or development of Microsoft Dynamics and Microsoft Power Platform functionality.

We have over 65 developers skilled in this space and offer prices aimed at allowing you to set your margin, when you already have a customer and need some form of assistance with this skill set.

Integrity is a core value of our business, and you are assured of continuing to manage your customer while receiving a quality service.

Services

Customisation and building of functionality

We will build to your specification and prefer User Stories owned by the business, as well as detailed Technical User Story.

Preparation of documentation for sign off

We can act as a bridge between your business customer and the technology, wearing your uniform.

Trouble shooting and support

At your request we can troubleshoot and address issues in your customer's environment.
